June 6, 2022
For Immediate Release

City Theatrical to Demo Multiverse Studio Kit at Cine Gear LA Expo 2022

City Theatrical will be demonstrating new technology for the film industry in **West Hall Booth 673 at Cine Gear Los Angeles Expo** at the Los Angeles Convention Center at LA Live from June 9, 2022 through June 12, 2022.

City Theatrical demonstrations at Cine Gear LA Expo will include award-winning [Multiverse® wireless DMX/RDM technology for film & video](#) projects. Multiverse marks the fifth generation of City Theatrical's engineering development for wireless DMX technology. The Multiverse system can deliver more data while reducing the amount of radio energy required for wireless DMX by as much as 90%, enabling scalability never possible before in the film industry.

The [Multiverse Studio Receiver](#) brings the advanced features of the Multiverse wireless DMX/RDM system to the film and video world with fast setup and reliability. It contains a long-life lithium-ion polymer battery giving 20 hours of use, and its full four button user interface with a backlit LED display makes setup easy and gives feedback on system performance. Each Multiverse Studio Receiver includes a DMX corded connector, which allows the external antenna to hang below the lighting fixture, giving improved data fidelity. The Multiverse Studio Receiver 900MHz/2.4GHz (P/N 5904) has two built-in radios, 2.4GHz (for worldwide use) and 900MHz (for use in the Americas only), which allow the user to select which single universe to receive, and which radio band to use via the Multiverse SHoW ID.

The [Multiverse Studio Kit](#) provides all the tools lighting technicians need to quickly plan, setup, and operate wireless DMX/RDM on set – all within an easy to use kit with contactless charging. Each Multiverse Studio Kit includes: six Multiverse Studio Receivers, one [Multiverse Transmitter](#) with hanging bracket and clamp (for multi universe broadcasts), one [Multiverse Node](#) with hanging bracket and clamp (for single universe broadcasts), one [DMXcat® Multi-Function Test Tool](#) (to turn on and troubleshoot any lighting fixture on set), one [RadioScan® Spectrum Analyzer](#) (for broadcast planning), and various accessories to keep your equipment organized, mounted, and charged.

The [Multiverse Studio Add On Kit](#) was developed to provide an easy way for film & video professionals to scale up wireless DMX projects. This kit features six Multiverse Studio Receivers in a contactless charging case. Individual chargers and USB cables are also included to enable charging or powering individual units outside the case.

City Theatrical demonstrations at Cine Gear LA Expo 2022 will also include [QolorFLEX® HiQ High CRI LED Tape](#), which is an ideal high CRI LED tape for the needs of the film industry that is among the newest of the 45+ LED tapes in the QolorFLEX brand of LED tape, dimmers, and accessories. QolorFLEX HiQ High CRI LED Tape has a Color Rendering Index (CRI) of 95 and is available in three types, 3200K, 6000K, and 2700-6500K in a single chip. QolorFLEX HiQ High CRI LED Tape offers exceptional on-camera color rendition and the ability to match the light sources already being used on film and video sets.

Other QolorFLEX demonstrations available at the expo will include [QolorFLEX 5-in-1 LED Tape](#), [RGBACW](#), [QolorFLEX UV LED Tape](#), [QolorFLEX NuNeon™](#), [QolorPIX® Pixel Controlled LED Tape](#), and [QolorFLEX Dimmers](#).

These and many other City Theatrical products for film & video projects are available through [City Theatrical dealers](#) worldwide. Explore City Theatrical's full product offering for film in its [Film & Video Brochure](#).
