The Multiverse® Transmitter 900MHz/2.4GHz opens a new world in wireless DMX/RDM. This product is licensed for use in North America only.

Its Ethernet input allows it to take in Streaming ACN (sACN) or Art-Net and to transmit up to nine user-selectable universes of DMX/RDM, with the ability to use less radio energy than a present-day single universe wireless DMX transmitter.

Each **Multiverse Transmitter** has a Bluetooth radio receiver built in that allows it to communicate with City Theatrical's multi award winning DMXcat® app from the user's smartphone. This gives the user smartphone control of any lighting fixture that is part of the Multiverse setup, whether it is a lighting fixture with a Multiverse Module inside, a lighting fixture receiving its data from a Multiverse Node, or any wired fixture downstream of those devices.

Multiverse Transmitter is Wi-Fi enabled, allowing for communication and control from tablet-based Wi-Fi lighting controllers like Luminair.

Note: Multiverse Transmitter (P/Ns 5910 and 5911) does not utilize SHoW DMX Neo SHoW IDs. Thus, Multiverse Transmitter is not compatible with SHoW Baby 6 or earlier versions of SHoW Baby products. It is compatible with Multiverse SHoW Baby when the Multiverse SHoW Baby is set to a Multiverse SHoW ID.
