

# MOVING LIGHT ASSISTANT

moving light documentation software

## FEATURES:

- Document consoles presets/palettes and cues. Add photographs, focus graphics and text notes.
- Spreadsheet view showing configuration (lenses, lamps, menu options etc.) of moving light fixtures in the rig.
- Design and Edit moving light gobo, colour and effect wheel loads.
- Integrated Gobo and Fixture library. Easily customised and updated.
- Import console reports from leading lighting consoles.
- View cue list, cue data and channel data. Examine channel usage including maximum intensity, preset use, redundant moves and more.
- Track current cue and photographs in the cue list with the lighting console in real time using Midi Show Control.
- Design, print or generate PDF paperwork reports.
- Import and Export rig data with Lightwright.
- Take photographs directly into the application with a compatible DSLR camera connected via USB
