

Used to hang projection equipment from a vertical pipe, City Theatrical's **Projector Hanger** enables easy removal and replacement of projectors without having to unscrew the pipe coupling.

City Theatrical's **Projector Hanger** connects 1½" schedule 40 steel vertical pipes to projectors in a safe and efficient manner. The hanger provides a simple, one motion lock-in mechanism that eliminates the need to twist heavy projector equipment around a mounting pipe manually.

Simply attach the **Projector Hanger's** couplings to the projector and to the pipe, mate the tapered connections together, and tighten the knurled tightening knob.

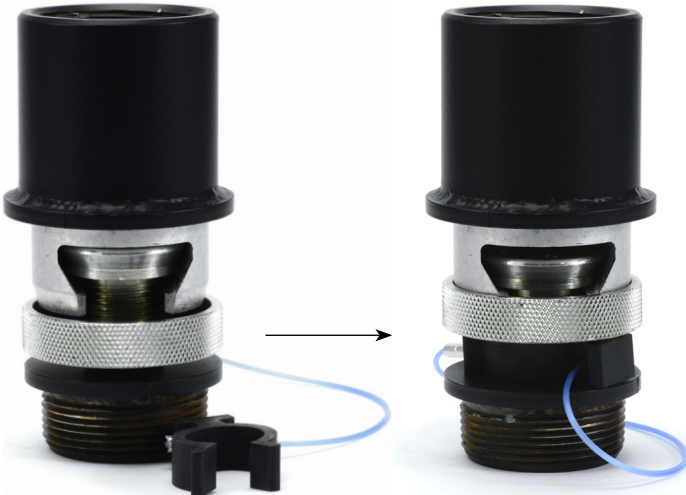

The Projector Hanger's Tee Slot System allows the user to slide the Tee Head, which attaches to the top of the projector, into the Tee Slot, which mounts at the end of a 1½" pipe.

SPECIFICATIONS:

Physical		
Height	4.85 in	(12.32 cm)
Diameter	2.62 in	(6.65 cm)
Weight	3 lbs.	(1.36 kg)
Mounting Pipe Diameter	1½" schedule 40 steel	
Load Rating	200 lbs. in a straight down application	
Construction	Aluminum; Steel	
Connection Method	One motion lock-in	

FEATURES:

- Holds up to 200 pounds hanging straight down
- One motion lock-in mechanism
- Eliminates the need to manually twist heavy projector equipment around mounting pipes
- Makes connecting vertical pipes to projectors more safe and efficient at height

The one motion lock-in mechanism eliminates the need to manually twist heavy projectors to connect them to vertical pipes.
