Broadway Music Stand Light #4200

Most pit bands use simple music stand lights to light their sheet music. But when the band is on stage and are above the audience's eye level, those music stand lights can be seen by audience members. Our Broadway Music Stand Light #4200 is an elegant solution to this problem. We add a hexcel louver to the light to provide 45° cutoff and to keep the bright and distracting light out of the eyes of the audience.

Broadway Music Stand Features:

- This is the light specified by many Broadway shows and tours
- The light from the fixture stays on the music, and out of the eyes of the audience
- Maximum wattage 60w T-10 bulb
