

City Theatrical's Custom Work May 2018

Although City Theatrical manufactures a large catalog of unique lighting accessories, we also like to do custom work, and can do it incredibly quickly. If you need a custom design or fabrication of metal lighting products, electronic design, LED power supplies, custom wireless DMX installations, or nearly any other challenge that you can come up with, call us and we will help you through it. We've done custom work for major TV networks, theme parks, museums, architectural projects, and just about any other type of lighting project you can imagine.

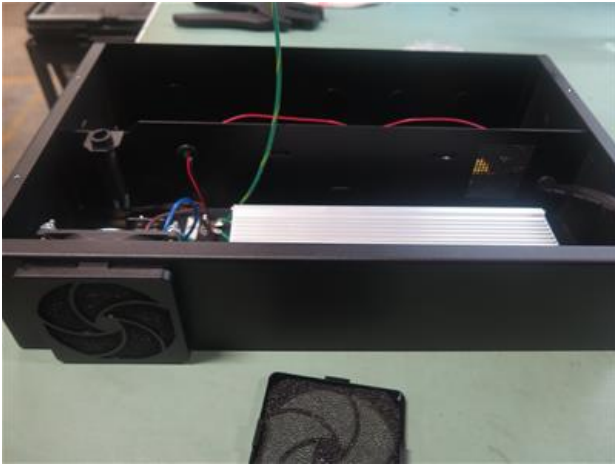

Custom Retro Film/Video Fixture

- Project Type:** Broadway show and tour
- Challenge:** A new Broadway show needed to recreate the look of a vintage nine light film light, but with LED light sources.
- Solution:** The customer supplied the LED fixtures and we designed a custom sheet metal housing around them.
- Material:** Steel

Custom Concentric Rings

- Project Type:** UK Tour
- Accessory for Fixture Type:** GLP Impression X4L
- Challenge:** Client needed 27 custom Concentric Rings for moving lights on a European Tour. The Concentric Rings would be used to cut glare.
- Solution:** We acquired the fixture and created a prototype Concentric Ring for the client once reviewed and approved we created the remainder of the order.
- Material:** Steel

Custom LED External Driver

Project Type: Architectural installation

Challenge: Client needed an LED driver for an architectural installation that would not flicker on camera. The driver needed to be UL 508A listed and able to be stored in electrical closets. The driver also had the classic analog control for an household LED circuit, as well as the DMX capabilities of up to 250 steps control for fine tuning!

Solution: We took all the requirements requested by the customer and built a prototype that allowed for all of the requested capabilities. The client requested replicas for more installations.

Material: Steel

Custom AutoYoke

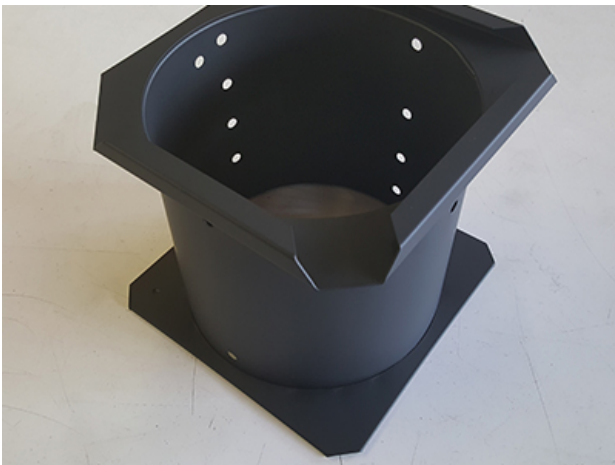

Project Type: Part of a permanent lighting rig

Accessory for Fixture Type: Chauvet

Challenge: A request for a custom version of our AutoYoke to hold a Chauvet fixture, and to be white.

Solution: We revised the metalwork for the AutoYoke to make it fit the Chauvet fixtures and to be sure they balanced properly with the accessory specified.

Material: Aluminum

Custom Color Extender for a Flame Effect

Project Type: OEM Manufacturer

Challenge: A customer wanted a modified version of our standard Color Extender for a device that produces a flame effect.

Solution: We revised our drawings and produced a series of holes in the cylinder of a Color Extender.

Material: Steel

Custom Top Hat

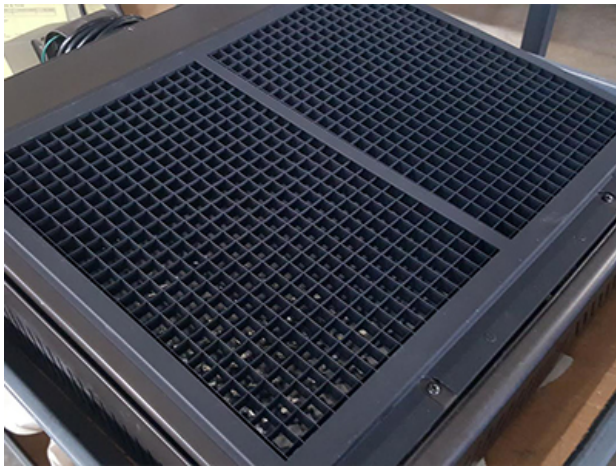

Project Type: Nighttime Helicopter Training

Accessory for Fixture Type: Gantom Flood

Challenge: Client needed four Top Hats that were 22° degrees that would shine light in a small area for night training.

Solution: We acquired the fixtures and created Top Hats that could meet the request of the client.

Material: Steel

Custom Light Shield

Project Type: Architectural installation

Accessory for Fixture Type: Security Light

Challenge: Client needed custom beam control accessories to reduce the amount of glare on building mounted 2' x 2' rectangular LED light fixtures used as security lights in New York's Garment District.

Solution: We acquired the fixture and created the Light Glare Shield for the fixture.

Material: Steel
