

**TEE SLOT WITH INTEGRAL
 SPLIT COUPLER**
P/N: 138

The Tee Slot with Integral Split Coupler is the receiving part of the Moving Light Hanger System. The Tee Slot works in conjunction with the Tee Head to hang a moving light in the same place each time. The 138 Tee Slot is built on a Integral Split Coupler for mounting the Slot on a pipe. The Tee Head settles into a groove in the Tee Slot to temporarily hold the head in place even when the Tee Head knob isn't tightened.

P/N: 138

Features:

- Can hold up to 100 pounds hanging straight down
- Designed to be used with P/N 135 Tee Head
- Integral Split Coupler for mounting Tee Slot on a pipe
- Safety groove to secure the Tee Head even when it isn't locked down

Weight: 1.5 lbs.

Dimensions: 3-1/16 " W x 4"H x 5-3/8"D

A FEW DOs AND DON'Ts:

DO:

Remember to tighten the tightening knob on the Tee Head against the base of the Tee Slot.
 Remember to insert and settle the Tee Head fully into the Tee Slot prior to tightening the tightening knob.

DO NOT:

Weld anything to the Tee Slot or Tee Head.
 Use the Tee Slot System to hang any personnel.
 Use the Tee Slot System to hang a structure on which personnel will be working.
 Use the Tee Slot System for any purpose for which it was not intended.
