

The **Multiverse® Node 2.4GHz** is the first building block of the Multiverse system.

Each **Multiverse® Node 2.4GHz** is a transceiver. As a single universe transmitter, it functions in a similar plug and play manner to the Multiverse® SHoW Baby® and legacy SHoW DMX SHoW Baby® products, but contains a 2.4GHz radio and full user interface, with four buttons and a backlit LCD display.

As a receiver, the **Multiverse Node** is the primary single universe standalone receiver in the Multiverse system, and can be part of a larger multi-universe setup.
