

**Power Supply, Mean Well, 75W, 24V
 P/N RSP-75-24**

Power Supply, Mean Well, 75W, 24V (P/N RSP-75-24) are Mean Well 24V Power Supplies that are used to power 24V LED tape in an indoor setting. This Power Supply's voltage and wattage must be matched in both to the LED tape project you are specifying. These Mean Well 24V Power Supplies, 75W are used to power 24V LED tape in an indoor setting.

City Theatrical uses Mean Well and other fine LED Power Supplies to power LED tape. The power supply must be matched in both voltage and wattage to the LED tape project you are specifying, and this is often a difficult and confusing moment for lighting users. Contact us for help in designing and laying out your project. We can talk you through it and help you put your order together.

SPECIFICATIONS:

Physical		
Length	159 mm	(6.25 in)
Width	97 mm	(3.82 in)
Height	30 mm	(1.18 in)
Configuration	Enclosed	
Mounting Type	Panel	

Electrical	
Voltage, Output	24 VDC
Voltage, Input	85~264 VAC
Current, Output	3.2A
Power, Output	76.8W
Number of Outputs	1
Operation	PFC
Primary Type	AC-DC

Product Information	
Power Supply Type	Commercial
Use Environment	Indoor
IP Rating	IP20
Warranty	One year
Compliance	CE, RoHS
