

Track Tamers™

If you have ever hung a lighting fixture with a standard Unistrut nut you'll understand why we recommend Track Tamers instead. With a standard Unistrut nut, the nut is not solidly seated in the track and it's easy for it to become dislodged, creating a dangerous situation for the electrician and those beneath him.

City Theatrical Track Tamers seat solidly in the track, and **separate the lock down of the track from the lock down of the lighting fixture.**

Track Tamers are faster, easier, and safer, and they have a rated working load of 500 lbs. (226 kg).

PART NUMBER	NAME	IMAGE	USAGE
520	Track Tamer with Hex Nut		Hang equipment from Unistrut®
520M	Track Tamer with Hex Nut (metric)		Hang equipment from Unistrut®
521	Track Tamer with Knob		Hang equipment from Unistrut®
521M	Track Tamer with Knob (metric)		Hang equipment from Unistrut®
523	Track Tamer with Aluminum Split Coupler		Adapt Unistrut® to pipe
525	Track Tamer with Galvanized Clamp and Hex Nut		Adapt Unistrut® to pipe
530	Track Tamer with Hex Nut and 5/8" Male Pin		Hang film or video equipment from Unistrut®
531	Track Tamer with Knob and 5/8" Male Pin		Hang film or video equipment from Unistrut®
