an ETC Company

2725 Top Hat for High End Halcyon Titanium, also shown on fixture

Top Hats for High End Systems Halcyon

Two Flocked Standard Top Hats for High End Systems Halcyon Gold and Titanium Moving Light Fixtures

These new Top Hats were developed based on City Theatrical's understanding of the unique accessory needs of lighting professionals, and the high demand for this moving light fixture in the market.

- Each new Top Hat for High End Systems Halcyon is a beam control product that is flocked and offers control of stray beams and light spill.

- Like all City Theatrical Top Hats, these new Top Hats for High End Systems Halcyon help prevent light spill from modern LED fixtures, which can extend nearly 180 degrees from the light source.

- City Theatrical currently offers various styles of beam control accessories for moving light fixtures ranging from manufacturers such as ETC® and High End Systems, CHAUVET®, GLP®, Martin® Lighting, and VARI-LITE®.

- Installation Guides for the new Top Hats for High End Systems Halcyon fixtures are available in the downloads section of product page on the City Theatrical website.

The new Top Hats for High End Systems Halcyon will be used in *Once Upon a One More Time*, coming soon to Broadway, with lighting design by Ken Posner.
