Radio Compliance Information

5792M SHoW DMX Neo® Radio Transceiver

FCC ID: VU65792

IC ID: 7480A5792

FCC Part 15

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/ TV technician for help.

Radio Frequency Notifications

FCC Notifications

RF Radiation The Product is an intentional radiator of Radio Frequency (RF) energy. In order to limit RF exposure to personnel in the immediate area, the Product should be located and installed such that a separation of at least 20 centimeters is maintained between the Product's antenna and personnel in the vicinity of the device.

Modification Warning

Caution: changes or modifications to this equipment, not expressly approved by City Theatrical Inc. could void the user's authority to operate the equipment.

Industry Canada Notifications

This Class B digital apparatus complies with Canadian ICES-003. Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

Product Installation and Configuration Guide © City Theatrical Inc. 2007

5792M Approved Antenna

To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (e.i.r.p.) is not more than that permitted for successful communication.

This device has been designed to operate with the antennas listed below. Antennas not included in this list or having a gain greater than 6 dB are strictly prohibited for use with this device. The required antenna impedance is 50 ohms.

5792M FCC/IC Approved Antennas:

Manufacturer	Model	Type	Connector	Gain
Nearson	S151AH-2450S	Omni whip	SMA plug reverse polarity	5dBi
Nearson	S141AH-2450	Omni whip	SMA plug reverse polarity	2dBi
Nearson	S131AH-2450	Omni whip	SMA plug reverse polarity	2dBi
Nearson	DG102N-2.4/5.25	Omni whip	SMA plug reverse polarity via provided Antenna Cable	5dBi
Centurion	WCP2400-MMCX4	Omni whip	MMCX jack on 4" coax pigtail	2.5dBi
Maxrad	MP24008XFPT	Panel	SMA plug reverse polarity via provided Antenna Cable	8dBi
Maxrad	MYP24010PT	Yagi	SMA plug reverse polarity via provided Antenna Cable	10dBi
Maxrad	MYP24014PT	Yagi	SMA plug reverse polarity via provided Antenna Cable	14dBi

5792M CE Approved Antennas:

Manufacturer	Model	Type	Connector	Gain
Nearson	S151AH-2450S	Omni whip	SMA plug reverse polarity	5dBi
Nearson	S141AH-2450	Omni whip	SMA plug reverse polarity	2dBi
Nearson	S131AH-2450	Omni whip	SMA plug reverse polarity	2dBi
Nearson	DG102N-2.4/5.25	Omni whip	SMA plug reverse polarity via provided Antenna Cable	5dBi
Centurion	WCP2400-MMCX4	Omni whip	MMCX jack on 4" coax pigtail	2.5dBi

CE Mark Conformity

City Theatrical Inc. declares that this product conforms to the specifications listed in this manual, following the provisions of the European R&TTE directive 1999/5/EC:

City Theatrical Inc. vakuuttaa täten että dieses produkt tyypinen laite on direktiivin 1999/5/EY oleellisten vaatimusten ja sitä koskevien näiden direktiivien muiden ehtojen mukainen.

City Theatrical Inc. déclare que le produit est conforme aux conditions essentielles et aux dispositions relatives à la directive 1999/5/EC.

- EN 301 489-1, 301 489-17 General EMC requirements for Radio equipment.
- EN 60950 Safety
- EN 300 328 Technical requirements for Radio equipment.

CAUTION—This equipment is intended to be used in all EU and EFTA countries.

Outdoor use may be restricted to certain frequencies and/or may require a license for operation. Contact local Authority for procedure to follow.

Note: ESD precautions should be used when attaching or removing the antenna.

Note: Combinations of power levels and antennas resulting in a radiated power level of above 100 mW equivalent isotropic radiated power (EIRP) are considered as not compliant with the above mentioned directive and are not allowed for use within the European community and countries that have adopted the European R&TTE directive 1999/5/EC. For more details on legal combinations of power levels and antennas, contact City Theatrical Inc.

Do not use this product near water, for example, in a wet basement or near a swimming pool.

Avoid using this product during an electrical storm. There may be a remote risk of electric shock from lightning.

Q52 Regulatory information*Radio Frequency Notifications*

Belgique Dans le cas d'une utilisation privée, à l'extérieur d'un bâtiment, au-dessus d'un espace public, aucun enregistrement n'est nécessaire pour une distance de moins de 300m. Pour une distance supérieure à 300m un enregistrement auprès de l'IBPT est requise. Pour une utilisation publique à l'extérieur de bâtiments, une licence de l'IBPT est requise. Pour les enregistrements et licences, veuillez contacter l'IBPT.

France 2.4 GHz Bande : les canaux 10, 11, 12, 13 (2457, 2462, 2467, et 2472 MHz respectivement) sont complètement libres d'utilisation en France (en utilisation intérieur). Pour ce qui est des autres canaux, ils peuvent être soumis à autorisation selon le département. L'utilisation en extérieur est soumise à autorisation préalable et très restreinte. Vous pouvez contacter l'Autorité de Régulation des Télécommunications (<http://www.art-telecom.fr>) pour de plus amples renseignements.

System Compliance Information

The 5702M SHoW DMX SHoW Baby® 6 Transceiver is CE Certified

Standards Applied:

BS EN 60950-1:2002 incorporating Corrigendum No. 1 and Amendment No. 1
EN 55203-1: 1996
EN 55203-2: 1996
EN 301 489-1 V1.4.1
EN 301 489-3 V1.4.1

Products Conform to CE Marking Directive 93/68/EEC
All SHoW DMX models are RoHS compliant

Safety Notices

Please read this entire manual before using your new equipment. Please keep the manual in a safe place so you can refer to it in the future as required.

The SHoW DMX System is intended for use only by qualified professionals. Connection, installation, and hanging of this equipment must be performed in accordance with all pertinent local, regional, and national safety codes and regulations.

SHoW DMX equipment is intended for indoor use only unless specified for outdoor use.

Keep the equipment dry! Do not operate the equipment if it gets wet!

Do not operate in excessive heat/direct sunlight.

Be sure installation provides adequate ventilation.

There are no user-serviceable parts inside! Refer to qualified service personnel!

RF Exposure: The antenna(s) used for this transmitter must be installed to provide a separation distance of at least 20cm from all persons and must not be collocated or operating in conjunction with any other antenna or transmitter.

Introduction

Thank you for using City Theatrical's SHoW DMX SHoW Baby® 6 Wireless DMX/RDM Transceiver.

The SHoW DMX SHoW Baby 6 represents a breakthrough in plug-and-play wireless DMX and RDM transmission, and can be used either as a wireless DMX transmitter or receiver. All you need now to set up a SHoW DMX wireless DMX system is two SHoW DMX SHoW Babys and two minutes!

The SHoW DMX SHoW Baby 6 features include:

- SHoW DMX Neo® 2.4GHz Frequency Hopping Spread Spectrum (FHSS) Radio
- Wirelessly broadcast and receive a full Universe (512 slots) of DMX
- Robust wireless DMX512 and RDM data transmission
- Six Possible SHoW IDs – including the original SHoW Baby 201
- Full Compatibility with previous SHoW Babys
- Extremely low 7mS max latency
- RDM proxy and responder functions
- Instant plug-and-play configuration: *For a Transmitter, connect DMX IN, for a Receiver, don't!*
- 72mW ETSI broadcast power (with 2dBi Antenna)
- Mounting bracket for installation with C-Clamp or similar hanging hardware
- Included CL2 Power Supply
- Included 2dBi Omni-directional Antenna
- Neutrik® 5P XLR Connectors for DMX IN and DMX OUT (3 pin in 5702M-3)

Every effort has been made to anticipate your questions in this manual, but if you have any questions that are not answered here, or you want to discuss a special application, please feel free to contact us directly at City Theatrical.

SHoW DMX SHoW Baby 6 Neo Settings

The SHoW DMX SHoW Baby 6 uses the 5792 SHoW DMX Neo Radio Module. It is permanently configured with six SHoW ID options for Adaptive Spread Spectrum Frequency Hopping and Neo Low Latency broadcast mode. Using RDM, you can adjust SHoW ID, adjust the broadcast power, edit the RDM Device Label, and enable or disable RDM traffic. No other settings are adjustable. The SHoW ID can also be changed by pressing the small button on the back of the SHoW DMX SHoW Baby® 6 labeled "SET ID".

Color	SHoW ID	Description
Green	201	Neo Adaptive
Cyan	102	Neo Full Bandwidth
Magenta	117	Neo Low Limited Bandwidth
White	133	Neo Mid Limited Bandwidth
Red	149	Neo High Limited Bandwidth
Yellow	165	Neo High Limited Bandwidth

SHoW DMX SHoW Baby 6 Antennas

The SHoW DMX SHoW Baby 6 is shipped with a 2dBi omni directional antenna. Any of the approved antennas listed above may be used with the SHoW DMX SHoW Baby[®] 6 (please note the special installation requirements for use with the CTI # 5636 14 dBi Yagi Antenna).

ETSI power settings for all 5792M SHoW DMX Neo Radio module equipped products, including the SHoW DMX SHoW Baby 6, are based on use with the CTI 5630 5 dBi Omni Antenna. ETSI power and range will vary with the antenna used. Contact your dealer or City Theatrical for more information.

DMX512 Setup and Operation

A SHoW DMX SHoW Baby 6 system will normally consist of at least two SHoW Baby 6 units.

Transmitter Setup

Although a simple SHoW Baby 6 system will have one transmitter and one or more receivers, you can use up to six SHoW Baby 6 units as transmitters set on different SHoW IDs to create a multi universe system. The following instructions describe how to set up a single universe system.

1. Install the SHoW DMX SHoW Baby 6 you will use for a transmitter in a convenient location where you can reach it with the DMX cable from your console or controller. For best results, locate the unit as high in the air as possible to enable it to be clear of obstructions. Consider where you will put your SHoW Baby 6 receivers and place the SHoW Baby 6 transmitter where its antenna will be within line of sight with the receivers, if possible.
2. Install the provided antenna and point it straight up in the air.
3. Connect the provided 12V DC Power Supply to the unit, and connect to mains power.
4. Select a SHoW ID for your transmitter by choosing an ID/Data LED color using the Set ID button located on the rear next to the power jack.
5. Connect a DMX cable from the console/controller to the DMX IN. The SHoW Baby 6 will automatically configure itself as a transmitter and the Tx LED will light. The DMX IN will be automatically terminated, and the DMX OUT will be available as a DMX pass-thru. If you also connect a cable to the DMX OUT the termination is lifted.
6. As soon as you begin sending DMX from your console, the SHoW Baby 6 will begin broadcasting and the Data LED will light solid.

Receiver Setup

You will need at least one SHoW DMX SHoW Baby 6 to use as a receiver.

1. Install the SHoW Baby 6 you will use for a receiver in a convenient location where you can reach it with a DMX cable to the device (or devices) it will be providing DMX for. As with the SHoW Baby 6 transmitter, locate the unit higher in the air for best results, and try to place your SHoW Baby 6 receiver where its antenna will be within line of sight with the transmitter.
2. Install the provided antenna and point it straight up in the air.
3. Connect the provided 12V DC Power Supply to the unit, and connect to mains power. The SHoW Baby 6 will be configured as a receiver and the Rx LED will light.
4. Select a SHoW ID by matching the ID/Data LED color to that of the transmitting SHoW Baby 6 you wish to receive DMX data from by using the button located on the rear of the unit next to the power jack. Transmitter and receiver SHoW ID colors must match for them to communicate.
5. Connect a DMX cable from the SHoW Baby 6 DMX OUT to the first DMX device you want to provide DMX to. You can then continue to add up to 32 more DMX devices to the chain. Like any other DMX system, be sure the last connected device in the chain is properly terminated.
6. As soon as you begin broadcasting from the SHoW Baby 6 set up as your transmitter, the data will be received by the SHoW Baby(s) 6 set up as receiver(s) and the transmitted DMX will be output from the receiver unit's DMX OUT. The received signal strength will be displayed on the four LO – RF Signal – HI LEDs. This four LED “meter” will light to show your signal strength; a good wireless signal is three or more LEDs, and weaker signal is two or less.

You can set up any number of additional SHoW Baby 6 units as receivers.

RDM Operation

RDM stands for Remote Device Management. RDM is a lighting control protocol enhancement to DMX512 specified by PLASA (formerly ESTA); the official name is *ANSI/ESTA E1.20, Entertainment Technology - Remote Device Management over USITT DMX512*.

To learn more about RDM, a good place to start is the Wikipedia article on RDM (lighting) at: [http://en.wikipedia.org/wiki/RDM_\(lighting\)](http://en.wikipedia.org/wiki/RDM_(lighting))

SHoW DMX SHoW Baby 6 is fully enabled as an RDM proxy system, so you can use RDM to manage your SHoW DMX SHoW Baby 6 system and any connected RDM responders that are downstream of the system.

In order to use RDM, you will also need an RDM controller or a lighting control console with a built-in RDM controller.

SHoW DMX SHoW Baby® 6 supports the following read-only PIDs:

PROXIED_DEVICE_COUNT
 PROXIED_DEVICES_ENHANCED
 SUPPORTED_PARAMETERS
 PARAMETER_DESCRIPTION
 PRODUCT_DETAIL_ID_LIST
 DEVICE_MODEL_DESCRIPTION
 MANUFACTURER_LABEL
 FACTORY_DEFAULTS
 SOFTWARE_VERSION_LABEL
 SENSOR_DEFINITION
 SENSOR_VALUE, OUTPUT_POWER

SHoW DMX SHoW Baby® 6 supports the following editable PIDs:

SHoW ID(editable, 201, 102, 117, 133, 149, 165)
 DEVICE_LABEL (editable)
 RDM_TRAFFIC_ENABLE (editable, 01 = enable, 00 = disable)
 OUTPUT_POWER (editable, 00=1mW, 01=14mW, 02=28mW, 03=72mW)

In order to allow RDM traffic and discovery and control of connected Responders you must enable RDM Traffic (Set RDM_TRAFFIC_ENABLE to 01).

Note that DMX transmission fidelity may be slightly reduced when RDM Traffic is enabled.

Installing the Mounting Bracket

The SHoW DMX SHoW Baby 6 is provided with a Mounting Bracket for use with ½" theatrical mounting hardware like a C-Clamp.

Mount the Bracket on the SHoW DMX SHoW Baby 6 using the 3 provided 8-32 x 1/2" Pan Head Philips screws.
