

CITY THEATRICAL

NEW YORK • LONDON

For Immediate Release

City Theatrical at Prolight + Sound Frankfurt

[City Theatrical](#) will be demonstrating innovative new technology at [Prolight + Sound Frankfurt](#) on April 4-7, 2017 (stand D59), including the award winning DMXcat™ Multi Function Test Tool, SHoW DMX® Multiverse™ wireless DMX, and the QolorPIX™ Pixel Controlled Tape and Pixel Controller. City Theatrical will be also showcasing new Pathway Connectivity products such as Choreo Vignette and Choreo NSB™.

All visitors to the City Theatrical stand will be entered into a drawing to win a free DMXcat™.

DMXcat™ Multifunction Test Tool makes it easy for anyone to control, analyze, or test any DMX lighting fixture, whether it's a simple LED PAR or a complex moving light. The system consists of a small hardware dongle and a suite of mobile applications. Together, they combine to bring wireless DMX and RDM control plus several other useful functions to the user's smartphone. The DMXcat solves the problem faced by all users of modern lighting equipment: How to turn on and test DMX lighting gear without using a complicated lighting console. The DMXcat works with both Android and iPhones.

SHoW DMX® Multiverse™ can broadcast up to five universes of DMX data in the 2.4GHz band (for use worldwide) or four universes of data in the 900MHz band (for use in the Americas). These tiny circuit board mounted modules are particularly suited for lighting equipment manufacturers who are interested in adding wireless DMX to their products. For the first time, due to small size, low cost, increased data transport, and ease of design integration, we believe that the implementation of a wireless DMX chip in every DMX device is possible.

QolorFLEX™ We have rebranded our growing line of low voltage dimmers for LED tape into the QolorFLEX™ family, assuring our users that all of our dimmers match perfectly with our ETL listed **QolorFLEX™ LED Tape**. We are adding a great new tiny dimmer, the **QolorFLEX™ 2x4A SHoW DMX Multiverse™ Dimmer**. Just 3.187" x .70" x .50" (81mm x 18.8mm x 12mm), it is small enough to fit in a 3/4" (19mm) tube and is designed for building into tiny spaces in props, candles, wands, costumes, and other special effects. Utilizing our SHoW DMX Multiverse radio, we have miniaturized the circuit board to take the minimum space possible.

US HEADQUARTERS
475 BARELL AVENUE
CARLSTADT, NEW JERSEY 07072

FAX +44 (0) 20 7183 6061

Configuration settings can be made through a computer (Windows or Mac) via a micro USB connection. No external power is required for this. Alternatively, configuration can be made via RDM through any RDM controller, such as City Theatrical's DMXcat™. Maximum load per channel is 4A and maximum load per device is 8A.

All of City Theatrical QolorFLEX Dimmers are feature rich, RDM enabled, and have the exceptionally smooth low end dimming that professionals demand.

QolorPIX™ Pixel Controlled Tape and Pixel Controller are an innovative approach to pixel control which offers a high level of creativity combined with plug and play usability. Each QolorPIX controller is preconfigured with personality profiles, which can be combined and tuned to produce thousands of dynamic effects using only a few DMX channels. Chases, fades, scrolls, bursts, and other effects can be created and saved as needed. QolorPIX Pixel Controlled LED Tape connects to the controller using industry standard four pin XLR connectors. Within one minute, the system can be up and running.

Choreo Vignette is a system of modular button and slider wall station inserts that allows the user to snapshot four universes of E1.31 sACN or one universe of DMX512. Design the wall stations needed, from single-gang up to six-gang. With both Ethernet or RS485 backbone architectures available, buttons can be Press-and-Hold-To-Record and Press to Play Back; sliders can control any sACN slot and be patched to many others using any Pathport gateway, or act as a grand master for the Vignette's output.

Choreo NSB™ is a system of modular button and slider wall station inserts that are fully compatible with Cognito2 and Choreo lighting control platforms. Design the wall station needed, from single-gang up to six-gang. Ethernet-based, any button or slide may be associated with Memories recorded in a Cognito2 or Choreo.
