SHoW DMX Neo™

Since we began making wireless DMX in 2002 with our WDS Wireless Data System, through our multi award-winning SHoW DMX, City Theatrical has been a world leader in the innovation of wireless DMX in the entertainment industry. Now, CTI is proud to announce our newest generation of wireless DMX: **SHoW DMX Neo**.

SHoW DMX Neo features the world's highest fidelity, combined with blazing fast 7mS (or less) latency. Users can choose from three operating modes, including Neo, Neo Adaptive, and Classic mode that is compatible with all existing SHoW DMX products.

Lighting professionals trust SHoW DMX. Nearly every Broadway and West End show that uses wireless DMX uses City Theatrical products, as well as many of the world's leading music tours and permanent lighting installations.

SHoW DMX SHoW Baby™

If SHoW DMX Neo is about user control, **SHoW DMX SHoW Baby** is about simplicity. Although SHoW Baby is fast and powerful, it has no user controls at all! Each SHoW Baby is a Transceiver. You don't need to purchase separate Transmitters and Receivers. To turn a Transceiver into a Transmitter, simply plug DMX in. To make it a Receiver, don't plug DMX in. That's all there is to it! All units are completely plug and play and you can set up your system in seconds.

But while SHoW Baby is simple to set up, it contains the same fast and powerful radio as SHoW DMX Neo, and since it is in the Neo family, you can mix and match SHoW Baby and Neo together in your system.
