Ithaca College Students Set New World's Record For Tallest Stack Of Stackers™ Top Hats

We give the new crown as world champions to the students of New York's Ithaca College for proving that 100 Stackers Tapered Top Hats can easily (well, with the help of a ladder) be stacked 11' -5" tall.

Stackers take up very little space on the shelf or in the truck on tour, while providing all the beam control features of standard top hats, including black flocked interiors. Stackers come in 20 different types to meet lots of different lighting needs.

Thanks to Michael Roche for sending these great photos, to the rest of the Ithaca stage crew, and to their Technical Supervisor Adam Klein.
