

Networking Solved

- Pathscape, the unified configuration tool for all Pathway Products, provides comprehensive network overview and powerful configuration tools
- End-to-end DMX512 over Ethernet management
- Versatile RDM controller for identifying, patching and setting modes on connected devices
- Rugged gear in every conceivable form-factor
- Portable and installed applications
- Support for ArtNet, E1.31 sACN, Pathport and Shownet
- Entertainment network management that makes sense

PATHPORT GATEWAYS. FEATURE RICH.

- Up to 64000 input universes according to protocol
- Unlimited outputs
- Slot-by-slot softpatch
- Merge either with sACN priorities or strict rules combining up to 8 inputs per slot
- · Each output port can have a unique patch
- · Port direction set by user, not by connector gender
- · Configurable cross fade when input priorities change

- Change input priorities on the fly with "Magic Channel"
- User-definable signal loss behavior
- Adjustable DMX512 update rate
- Pathscape Free configuration software utility compiled for Windows or Mac
- Pathscape includes E1.20 RDM Controller
- Gateway will unlock 512 free channels of control in CognitoPC off-line editor
- Special model converts Crestron and AMX ASCII control to reliable DMX512

A FORM FACTOR FOR EVERY APPLICATION.

RACK-MOUNT GATEWAYS PWPP RM P8 and P4

- Four or eight DMX512/RDM ports
- Rugged cast aluminum housing
- Front panel LCD display and encoder knob enables most parameters to be set without need for a computer
- Status LEDs for instant confirmation of port direction and activity
- XLR5F, Phoenix terminal and RJ45 etherCON connector options
- 19" rack-mount standard. Optional wall and truss-mount kits

- One, two or four DMX512/RDM ports
- 35mm DIN rail mountable
- Power-over-Ethernet or 24VDC operation
- Pluggable compression screw terminal and insulation displacement contact (IDC) connectors
- Network Fade Processor model for ASCII to DMX512 (PWINF NFP)

PORTABLE GATEWAYS PWPP HH P1 (shown), PWPP DT P1 and PWPP TM P1

- One DMX512/RDM port
- XLR5 female connector and EtherCon RJ45 connector
- Power-over-Ethernet device
- Rugged injection molded case rated at IP54 (HH handheld model only)
- LCD display with three-button user interface enables most parameters to be set without need for computer (HH - handheld model only)
- 9VDC battery enables use as portable handheld basic RDM controller and DMX512 tester (HH - handheld model only)

Pathport

WALL-MOUNT GATEWAYS PWPP WM P1 and P2

Patho

- One or two DMX512/RDM ports
- · Recessed, surface and portable mounting options
- Power-over-Ethernet or 24VDC input device
- · LCD display or LEDs to show port direction and activity
- XLR5 male and female connector options

MANAGED SWITCHES FOR ENTERTAINMENT NETWORKS.

- Designed and manufactured specifically for entertainment systems
- Rack-mounted models have front panel LCD display and an encoder knob that enables most parameters to be set without the need for a computer
- All models managed with Pathscape
- Management features include VLAN, EAPS Ring protection, RSTP, DHCP server and DHCP client, Dante QoS, port speed, bandwidth monitoring and PoE allocation

RACK-MOUNT 12-PORT INSTALLATION SWITCH PWVIA RM P12 RJ45EC SFPSLOT POE

DIN-MOUNT 8-PORT SWITCH PWVIA DIN P8 RJ45 SFPSLOT POE

Why choose VIA over consumer brand switches?

It's not just about road-proven robust hardware. You will find real time-saving management features that are easy to configure and understand. You won't have to go to school to learn how to use VIAs.

PoE Power over Ethernet	802NoReb
VLAN Virtual Local Area Networks	GigaLayNo
EAPS Ethernet Automatic Protection Switching	RedRingQuis
LLDP Link Layer Discovery Protocol	WhatSeeIder
DHCP Dynamic Host Configuration Protocol	RobFroiIP p

- 802.3af 15.4 Watts
- No need for power bricks or IEC's
- Reboot devices from Pathscape
- Gigabit fiber backbone
- Layer 2 indepedent LANs
- No IP conflict between departments
- Redundancy for cost of Cat5 cable
- Ring breakage heals in 1/20 sec
- Quickly find faults
- What's connected here?
- See devices come and go
- Identify Pathway gear at Layer 1
- Robust server at core of network
- Front panel configuration
- IP pool for each VLAN

- RJ45 etherCON connectors for copper
- Mini-GBIC SFP/SFP+ ports for fiber and opticalCON DUO or QUAD, depending on model
- Available for permanent rack installation, touring models and for DIN System Installations
- DIN-mounted models are ideal for sACN data distribution in networks using Pathport Gateways, Choreo or Cognito controllers and NSB or Vignette architectural wall stations

RACK-MOUNT 12-PORT TOURING SWITCH PWVIA RM P12 RJ45EC DUO POE

DIN-MOUNT 16-PORT SWITCH PWVIA DIN P16 RJ45 SFPSLOT POE

\$ \$ \$ \$ \$
T&C Trap and Convert

Bandwidth Monitor

IGMP Internet Group Management Protocol

- Easy Access from front display (rack mount models)
- Manage link speeds and find bottlenecks
- Reports % usage at current link speed
- Stops broadcast protocols polluting network
- Converts ArtNet to E1.31 sACN
- Lower burden on 10BaseT devices
- Reduce broadcast traffic everywhere
- Lessens network load on end devices
- Ideally pairs with Trap & Convert
- No fear of creating network loops
- Redundancy for cost of Cat5 cable
- No setup of ports required
- Simple Dante On/Off setup
- Uncompressed, low-latency audio
- Audio & Lighting on same network
- Increase throughput, reduce jitter
- Traffic priority & resource reservation
- Simple setup for audio

A pioneer in entertainment lighting, Pathway Connectivity is renowned for solid, easy-to-use equipment with comprehensive, robust features.

Our reputation for innovation and reliability is based on over twenty-five years commitment to enhancing the functions and interoperability of lighting systems around the world.
