PROJECT SNAPSHOT

Project Name: **Special Olympics Countdown at The Spheres**
Location: **Amazon's Campus, Seattle, WA**
Project Date: **March 2018**
Lighting Package: **Barbizon Light of the Rockies**
City Theatrical Solutions: **QolorPoint™ Wireless LED Uplighters and SHoW DMX SHoW Baby® 6 Wireless DMX**

CHALLENGES

To help celebrate 100 days until Seattle hosts the 2018 Special Olympics USA Games, Amazon set out to illuminate **The Spheres** with a special lighting display in the purple color that represents the games.

To create a lighting effect that could be seen throughout the city through 2,643 panes of glass, the lighting fixtures selected would need to create high intensity colored light from within The Spheres.

With 4,000 square foot grounds composed of a wide variety of plant life, the lighting fixtures for this special celebration and future events would require a high level of portability. The ideal fixtures would protect against water and humidity (with IP65 rating) and offer simple plug and play wireless control.

the spheres

A result of innovative thinking about the workplace, The Spheres are a place

where Amazon employees in downtown Seattle can think and work differently. The three massive glass-covered domes that make up The Spheres are home to more than 40,000 plants from over 30 countries.

SOLUTION

With the support of the team at Barbizon Lighting Company, Amazon used **QolorPoint Wireless LED Uplighters** to create a stunning light display that brought awareness and celebration to this momentous occasion.

“[QolorPoint Wireless LED Uplighters] were the best fixtures to light events at The Spheres due to the intensity, portability, IP65 rating and functionality with SHoW Baby’s wireless DMX.”

- Brandon Baker, Lighting Designer, Amazon

SOLUTION *(continued)*

To set up the QolorPoint Wireless LED Uplighters quickly and easily, SHoW DMX SHoW Baby 6 with Maximum Bandwidth Technology™ was used for its simple, plug and play DMX control. The combined uplighter and wireless DMX lighting solution by City Theatrical helped Amazon realize their vision and add to the visual impact of a citywide celebration.

“We used the QolorPoint fixtures for this event and they will be the only uplighters in The Spheres for the foreseeable future. These are fantastic fixtures and I look forward to using them moving forward.”

- Brandon Stirling Baker, Lighting Designer, Amazon
