For Immediate Release

City Theatrical to Launch QolorFLEX Multiverse Dimmers at LDI 2019

City Theatrical will be launching and demonstrating new technology in **Booth 435** at the **LDI Show 2019** at the Las Vegas Convention Center in Las Vegas, Nevada, USA from November 22 – 24, 2019.

Nominated as an LDI Show 2019 Best Debuting Product, City Theatrical's newest [QolorFLEX® 5x2.5A 900MHz/2.4GHz Multiverse® Dimmers](#) will be launching at the show. Available in dual band 900MHz/2.4GHz (P/N 5942) or 2.4GHz band only (P/N 5943), this new product is a constant voltage, five-output dimmer that can be controlled wirelessly with [Multiverse wireless DMX/RDM technology](#) or with wired DMX. This dimmer provides 20-bit PWM resolution and 16-bit or 8-bit control for extremely smooth dimming at the low end of the dimming curve. It uses detachable input and output connectors to make wiring easy. Configuration is performed using RDM, such as with a [DMXcat® Multi Function Test Tool](#), with no DIP Switches. This dimmer is designed and built in the USA by City Theatrical in Carlstadt, New Jersey and pairs perfectly with [QolorFLEX 5-in-1 LED Tape](#) for ideal use in props and costumes, or for areas where space is a concern.

City Theatrical will also be presenting new QolorFLEX 2x2.5A Multiverse Dimmers and Multiverse Receiver Cards at the LDI Show 2019. The **QolorFLEX 2x2.5A Multiverse Dimmers** (P/N 5916 for 2.4GHz band or P/N 5917 for 900MHz band) are tiny two-channel low voltage dimmers, each with a Multiverse wireless DMX receiver built in. These receiver/dimmers are designed to be mounted in the smallest spaces, such as props, costumes, wands, and candles.

While [Multiverse Modules](#) are circuit board mounted devices used by professional lighting manufacturers, City Theatrical's new **Multiverse Receiver Cards** are products that anyone can use to implement wireless DMX/RDM into their projects or equipment in a simple way. Multiverse Receiver Cards (P/N 5906 for 2.4GHz band or 5907 for 900MHz band) are full Multiverse receivers without the housing, XLR connectors, and user interface as used in wireless DMX receiving products like [Multiverse Node](#) and [Multiverse SHoW Baby](#). Multiverse Receiver Cards include an internal antenna and a connection to an optional external antenna. Configuration is done via RDM with DMXcat.

Other live demonstrations by City Theatrical will include LDI Show 2018 Best Debuting Product award winner [Multiverse Transmitter](#) with its ability to broadcast up to ten universes of DMX data from a single transmitter, [QolorFLEX NuNeon](#) as an incredibly flexible and bright alternative to traditional neon lighting, [QolorPIX Pixel Controlled LED Tape](#) for plug and play pixel control, [QolorPoint® Wireless LED Uplighters](#) for high quality wireless event lighting, and [Lightwright® 6](#) software for entertainment lighting data management.

June Abernathy, 30-year spotlight operator veteran and author of *The Spotlight Operator's Handbook*, will also be in City Theatrical booth 435 to show and discuss her books with visitors.

A comparison of the **Multiverse Module** (top left) to City Theatrical's newest Multiverse wireless DMX/RDM products, launching at LDI Show 2019, which include: **Multiverse Receiver Card** (middle), **QolorFLEX® 2x2.5A 2.4GHz Multiverse® Dimmer** (top right) and **QolorFLEX 5x2.5A 900MHz/2.4GHz Multiverse Dimmer** (bottom). Multiverse Receiver Cards are products that anyone can use to implement wireless DMX/RDM into their projects or equipment in a simple way. QolorFLEX 2x2.5A Multiverse Dimmers are tiny two-channel low voltage dimmers, each with a Multiverse wireless DMX receiver built in, ideal for small theatrical props and costumes. QolorFLEX 5x2.5A Multiverse Dimmers are constant voltage, five-output dimmers that can be controlled wirelessly or with wired DMX to provide 20-bit PWM resolution and 16-bit or 8-bit control for extremely smooth dimming at the low end of the dimming curve.

About City Theatrical, Inc.

City Theatrical invents, manufactures, and customizes unique lighting accessories for the entertainment and architectural industries and is the winner of 35+ product and business awards, including the New Jersey Small Manufacturer of the Year in 2015. Founded in 1986, City Theatrical has offices in Carlstadt, New Jersey and London, England. Products include the multi award-winning DMXcat® Multi Function Test Tool, Multiverse® and SHoW DMX® wireless DMX systems, QolorFLEX® brand of professional LED linear lighting, Dimmers and Accessories including QolorFLEX 5-in-1 LED Tape, QolorFLEX NuNeon™, and QolorPIX® Pixel Controlled LED Tape and Tape Controller, QolorPoint® Wireless LED Uplighters and LED event lighting products, professional lighting software including Lightwright® 6, Moving Light Assistant™ and Vectorworks Spotlight, as well as the world's most extensive catalog of entertainment and architectural lighting beam control accessories and hardware. City Theatrical also performs custom manufacturing services and manufactures products on an OEM basis for other lighting manufacturers. Learn more about our professional [experience](#).
