

# CITY THEATRICAL

NEW YORK • LONDON

An **Environmental Lights** Company

June 05, 2024  
For Immediate Release

## City Theatrical's ABTT Theatre Show 2024 Preview

**City Theatrical** will be demonstrating new technology on **Stand B48** at [ABTT Theatre Show 2024](#) at the Alexandra Palace in London, England from 5 – 6 June 2024.

Live demonstrations by City Theatrical will include troubleshooting with the new [DMXcat-E™](#) (P/N 6100), which is an expansion to City Theatrical's [DMXcat® Multi Function Test Tool](#) system (P/N 6000) of solutions that allows for Ethernet control of a lighting fixture. In addition to all the functions DMXcat users currently enjoy, including utilization of the DMXcat free smartphone application for iPhone and Android to plan, install, operate, and maintain theatrical and studio lighting equipment, DMXcat-E allows users to view and send Ethernet protocols, including ArtNet and Streaming ACN (sACN). DMXcat-E also allows users to perform cable testing of 5-pin XLR and Ethernet cables via an included external remote. DMXcat-E can read SMPTE timecode as well as MIDI timecode and regular MIDI for audio and other entertainment projects. DMXcat-E uses bookmarking of timecode and save to file functions for ease of use. DMXcat-E also allows users to view DMX timings and PoE voltages. The DMXcat-E hardware is complete with a flashlight, buzzer, and USB-C charging.

City Theatrical's [Multiverse wireless DMX/RDM](#) system includes the [Multiverse Transmitter 2.4GHz](#) (P/N 5911), which has the ability to broadcast up to 10 universes of DMX data on the 2.4GHz band while using less radio energy than other single universe wireless DMX transmitters. City Theatrical's new [Multiverse Connect Module](#) (P/N 5914) is a small device that brings all the capabilities of Multiverse wireless DMX/RDM to a lighting fixture built by an OEM manufacturing partner of City Theatrical, such as Martin Lighting's MAC Viper XIP, such that the fixture has a Multiverse plug built into it. City Theatrical will also demonstrate accessories for Martin Lighting fixtures, including three new standard accessories for the MAC Viper XIP, including a [MAC Viper XIP Follow Spot Handle](#) (P/N 2815) to make the fixture usable as a Follow Spot, as well as Concentric Ring (P/N 2816) and Hexcel Louver (P/N 2817) accessories for beam shaping.

City Theatrical's new [QolorFLEX® Quad Chip RGB Amber Plus Deep Red LED Tape](#) (P/N 5050-24-RGBAD-60-5-20-1) is the most recent expansion to the QolorFLEX line of LED Tapes, Dimmers, and Accessories. It is the ideal LED tape for lighting designers looking to achieve a true deep red color in their lighting design projects. City Theatrical's QolorFLEX LED Tape demonstrations will also include flexible and bright [QolorFLEX NuNeon®](#), [Tunable White HiQ High CRI](#) linear lighting, and [QolorFLEX 5-in-1 HiQ High CRI LED Tape](#) for ultimate color control.

QolorFLEX LED Tapes connect easily to [QolorFLEX Dimmers](#) for ultra-smooth, flicker-free dimming. City Theatrical QolorFLEX Dimmers include a family of miniature low voltage wireless dimmers with Multiverse wireless DMX/RDM connectivity. [QolorFLEX 2x2.5A Multiverse Dimmers](#) (P/N 5916) are small, low voltage, constant voltage, two-output dimmers designed to be mounted in small spaces such as props, costumes, wands, and candles. [QolorFLEX 5x2.5A Multiverse Dimmers](#) (P/N 5943) are slightly larger and can be controlled wirelessly using City Theatrical's Multiverse wireless DMX/RDM technology, or with wired DMX. Both wireless DMX dimmer options can be used worldwide on the 2.4GHz band.

City Theatrical's new [Wing Nut Socket](#) (P/N 1350) can be used to secure any wing nut with ease and reliability. Simply attach City Theatrical's Wing Nut Socket to a 3/8" ratchet, slide the opening over any wing nut, and tighten or loosen the wing nut with ease, with more reliability than possible by hand. This simple yet smartly designed chrome tool is a must have for any lighting technician working with wing nuts on a regular basis.
