City Theatrical Expands Line of Moving Light Beam Control Accessories

City Theatrical has expanded its line of **Moving Light Accessories** with four new beam control products, including Top Hats designed to fit CHAUVET®, ETC® and High End Systems lighting fixtures, and Concentric Rings for GLP® X4L lighting fixtures. Once only custom made, these now standard accessories are in high demand for Broadway and Broadway-style productions in which lighting designers require precise control of light beams, often specifying an accessory for every moving light that goes into a show.

City Theatrical's new Moving Light Accessory products include [CHAUVET Rogue R2 Wash Top Hats](#), [ETC Releve Spot Top Hats](#), [High End Systems Solaframe 1000 Top Hats](#), and [GLP X4L Concentric Rings](#). Each **Top Hat** is designed to fit its lighting fixture model perfectly, and control light spill and reduce light reflection with interior flocking, similar to all of City Theatrical's [Standard Top Hats](#). The GLP X4L **Concentric Rings** are comparable in function to a full six-inch (152mm) Top Hat at only two inches (51mm) long.

All new **Moving Light Accessories by City Theatrical** are fabricated from light gauge aluminum with a black powdercoat finish. These additions complement a wide array of already available [Martin® Accessories](#) and [Vari-Lite® Accessories](#).

City Theatrical also works with lighting designers to create [custom](#) accessories for demanding applications. All custom and standard beam control accessories by City Theatrical are designed and made in its manufacturing facility in Carlstadt, New Jersey, USA.
