City Theatrical To Host Multiverse Node Webinar on May 21

City Theatrical is hosting its third webinar on Multiverse® Wireless DMX/RDM technology on Thursday, May 21, 2020, from 11AM EDT through 11:30AM EDT. Featuring the [Multiverse Node](#) product, this webinar will explain how to set up the Multiverse Node as a single universe transmitter, the primary single universe standalone receiver in the Multiverse system, or as part of a larger multi-universe setup.

The Multiverse Node functions in a similar plug and play manner to the [Multiverse SHoW Baby®](#) and legacy SHoW DMX SHoW Baby® products, but also has a full user interface, four buttons and a backlit LCD display. Key similarities and differences between the two products will be explored in the webinar.

The Multiverse Node Webinar is the third webinar in the six-part Multiverse wireless DMX/RDM Webinar Series. It will be hosted by City Theatrical Sales Specialist and seasoned Lighting Designer John Demous. Interested participants can [register to attend the event here](#).

The remaining three 30-minute webinars will run on consecutive Thursdays starting at 11AM EDT through June 11, 2020. This webinar series was developed in effort to provide education in wireless DMX to lighting professionals, as well as a digital forum for Q&A on Multiverse wireless DMX technology. **For the full schedule including past recordings and upcoming webinar registration links, visit: citytheatrical.com/multiverse#webinars.**

To view last week's live recording of *Webinar 02: Multiverse SHoW Baby*, please visit: <https://youtu.be/djoH1F53Z-Y>

Multiverse Transceivers are covered by U.S. Patent # 7,432,803 and other patents pending. The 900MHz band is licensed for use in North America only.
