City Theatrical to Host Sixth Multiverse Webinar in Series on Multiverse Receiver Card

City Theatrical is hosting its sixth webinar on Multiverse® Wireless DMX/RDM technology on Thursday, June 11, 2020 at 11AM EDT. Featuring the 2020-launched [Multiverse Receiver Card](#) product, this webinar will explore how anyone, whether they are an electrician, prop builder, tinkerer or inventor, can use the Multiverse Receiver Card to implement a tiny Multiverse wireless DMX Receiver into any DMX device.

Multiverse Receiver Cards are full Multiverse wireless DMX/RDM receivers without the housing, XLR connectors, and user interface as used in wireless DMX receiving products like the Multiverse Node and Multiverse SHoW Baby. Multiverse Receiver Cards include an internal antenna and a connection to an optional external antenna. Configuration for Multiverse Receiver Cards is done via RDM with DMXcat® Multi Function Test Tool, or with City Theatrical's USB Configuration Program for PC/Mac. In addition to receiving wireless DMX and outputting wired DMX, the Multiverse Receiver Card can output 0-10V, and has four PWM control outputs.

Interested participants in *Webinar 06: Multiverse Receiver Card*, which will be hosted by Harrison Hohnholt, can [register here](#).

City Theatrical's webinar series was developed to provide education in wireless DMX to lighting professionals, as well as a digital forum for Q&A on Multiverse wireless DMX technology. To view last week's live recording of *Webinar 05: QolorFLEX® Multiverse Dimmers*, please visit: https://youtu.be/_nQjww73p88

For the full list of past webinars as video recordings, visit: citytheatrical.com/multiverse#webinars.

The 900MHz band, as used in the Multiverse Receiver Card model 5907, is licensed for use in North America only.
