November 4, 2022
For Immediate Release

City Theatrical LDI 2022 Preview

City Theatrical will be demonstrating new technology in [Booth 730](#) at **LDI Show 2022** at the Las Vegas Convention Center in Las Vegas, Nevada from November 18 – 20, 2022.

City Theatrical will be demonstrating its recently expanded line of [QolorFLEX® LED Tape and Accessories](#) at LDI Show 2022. As the ninth and newest type of [QolorFLEX NuNeon®](#), [QolorFLEX NuNeon, Tunable White HiQ High CRI](#) (P/N N914-H27006500-5) brings the brightness and flexibility of QolorFLEX NuNeon linear lighting to the film and video world by combining it with City Theatrical's HiQ High CRI LED Tape technology. It offers exceptional on-camera color rendition with a Color Rendering Index (CRI) greater than 94, allowing lighting professionals to meet the needs of high quality film and video lighting.

To complement this new QolorFLEX NuNeon, Tunable White HiQ High CRI linear lighting, City Theatrical will be demonstrating four other [QolorFLEX HiQ High CRI LED Tapes](#) ideal for film and video projects, which range from color temperatures that include 3200K, 6000K, and 2700K to 6500K in a single chip, as well as recently launched [QolorFLEX 5-in-1 HiQ High CRI LED Tape](#) (P/N 5050-24-RGBH27006500-60-5-20-1), which is a 5-in-1 24V LED Tape with a CRI greater than 95 and is 25% brighter light than other 5-in-1 LED tapes for the needs of film and video projects.

City Theatrical demonstrations at LDI Show 2022 will also include award-winning [Multiverse® wireless DMX/RDM technology](#). The Multiverse system can deliver more data while reducing the amount of radio energy required for wireless DMX by as much as 90%, enabling scalability never possible before for entertainment lighting installations.

Multiverse wireless DMX/RDM technology is currently offered in a range of City Theatrical solutions, such as the best-selling [Multiverse SHoW Baby®](#) and [Multiverse Transmitter](#) among other products, as well as onboard wireless DMX technology native to many current and future ETC light fixtures as part of an [OEM manufacturing partnership](#). Light fixtures designed by ETC that currently include onboard Multiverse wireless DMX technology, including Source Four LED Series 3, fos/4 Fresnel, fos/4 Panel, ColorSource Relay, and HQ-100 Performance Hazer, will be available for demonstration at this year's LDI Show.

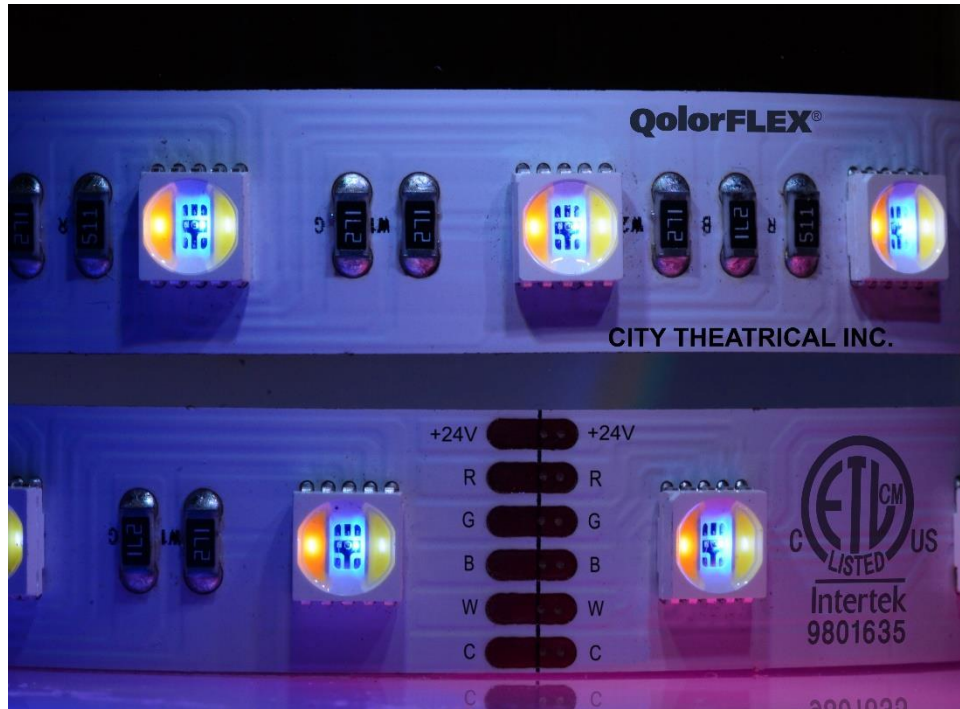

City Theatrical is also excited to share its [Multiverse Studio Kit](#) technology with LDI Show 2022 participants. This kit provides all the tools lighting technicians need to quickly plan, setup, and operate wireless DMX/RDM on set – all within an easy-to-use kit with contactless charging. Each Multiverse Studio Kit includes: six [Multiverse Studio Receivers](#), one [Multiverse Transmitter](#) with hanging bracket and clamp (for multi universe broadcasts), one [Multiverse Node](#) with hanging bracket and clamp (for single universe broadcasts), one [DMXcat® Multi-Function Test Tool](#) (to turn on and troubleshoot any lighting fixture on set), one [RadioScan® Spectrum Analyzer](#) (for broadcast planning), and various accessories to keep your equipment organized, mounted, and charged.

Explore City Theatrical's line of innovative lighting accessories for [film and video](#) before the show.
