For Immediate Release

City Theatrical's Multiverse Wireless DMX Recognized with Best Debuting Product Award at LDI 2018

City Theatrical's new **Multiverse**® wireless DMX system, recently launched at Live Design International (LDI) on October 19, 2018, was recognized by Live Design/LDI as the **2018 Best Debuting Product** in the Lighting Accessories and Integration category.

The **Multiverse** system can broadcast up to 10 universes of DMX data from a single transmitter while producing less radio energy than present-day single universe systems. Every product in the **Multiverse** system is built around a tiny radio called the **Multiverse Module**. These products include **Multiverse**® **SHoW Baby™**, City Theatrical's fourth generation of the original plug and play wireless DMX transceiver system, **Multiverse Node**, the primary receiver in a multiple universe system and a single universe transceiver, **Multiverse Transmitter**, a transmitter that provides multiple universe control, and **Multiverse Gateway**, a transceiver that delivers multiple universe DMX with data distribution.

Other products presented by **City Theatrical** at LDI 2018 include **DMXcat**® Multi Function Test Tool, **QolorFLEX**® **NuNeon™** linear lighting, plug and play **QolorPIX**® pixel control, as well as ultimate color blending and control with **QolorFLEX 5-in-1 LED Tape**, flicker-free dimming control with **QolorFLEX Dimmers**, lighting project paperwork organization with **Lightwright® 6** software, stunning event lighting effects with **QolorPoint® Wireless LED Uplighters**, and stray beam and spill control with beam control accessories like **Concentric Rings**.

DMXcat makes it easy for anyone to control, analyze, or test any DMX lighting fixture, whether it's a simple LED PAR or a complex moving light, including **QolorFLEX** products. Consisting of a small hardware dongle and a suite of mobile applications, **DMXcat** solves the problem faced by all users of modern lighting equipment: How to turn on and test DMX lighting gear without using a complicated lighting console. **DMXcat** is available for **iPhone**, **Android**, and **Amazon Fire** in English, Spanish, German, French, Italian, Korean, and Japanese.

QolorFLEX NuNeon is an incredibly flexible and bright sealed LED linear lighting product that can be used to replace traditional neon lighting. Up to 80% more flexible than similar products, **QolorFLEX NuNeon** was carefully developed to provide lighting and scenic designers with the ability to add bold and bright accents throughout entertainment and architectural projects. **QolorFLEX NuNeon** is available in RGB in 5m reels, and seven distinctive colors in 10m reels.

QolorPIX Pixel Controlled LED Tape is designed for the most demanding professional applications with 48 individually controlled LEDs per meter. Each reel includes a soldered-on four-pin XLR connector to create a plug and play connection to any one of the eight ports on the **QolorPIX Tape Controller**. The controller's user-friendly interface allows users to create thousands of professional dynamic lighting effects - chases, fades, scrolls, bursts, and more - in minutes.

Multiverse® wireless DMX system launched at City Theatrical's booth at Live Design International (LDI) in Las Vegas on October 19, 2018.

Award-winning **Multiverse®** wireless DMX/RDM products provide a new range of options for performing lighting tasks more easily than ever before, while producing less disruptive radio energy.

City Theatrical's new **Multiverse**® wireless DMX was recognized by Live Design/LDI as the **2018 Best Debuting Product** in the Lighting Accessories and Integration category.

About City Theatrical

City Theatrical invents, manufactures, and customizes unique lighting accessories for the entertainment and architectural industries and is the winner of 35 product and business awards, including the New Jersey Small Manufacturer of the Year in 2015. Founded in 1986, City Theatrical has offices in Carlstadt, New Jersey and London, England. Products include the multi award-winning DMXcat® Multi Function Test Tool, Multiverse® and SHoW DMX® wireless DMX systems, QolorFLEX® brand of professional LED linear lighting, Dimmers and Accessories including QolorFLEX 5-in-1 LED Tape, QolorFLEX NuNeon™, and QolorPIX® Pixel Controlled LED Tape and Tape Controller, QolorPoint® Wireless LED Uplighters and LED event lighting products, professional lighting software including Lightwright® 6, Moving Light Assistant™ and Vectorworks Spotlight, as well as the world's most extensive catalog of entertainment and architectural lighting beam control accessories and hardware. City Theatrical also performs custom manufacturing services and manufactures products on an OEM basis for other lighting manufacturers. Learn more about our [professional experience](#).
