"This was a remounted production, and various scenic and prop pieces were pulled from storage after being used in productions around the world. Our fantastic Production Electrician Gustavo E Valdes Munoz and his team got everything up and running again, with some on the latest City Theatrical Multiverse wireless DMX/RDM gear. We also had the opportunity to add set electrics, including QolorFLEX RGBI LED Tape, to a large scenic piece that has not had any electrics since the Broadway production. This addition really added another layer of visual energy and detail to the show."
